About Events by Benugo

When we founded Benugo 28 years ago we had a vision of not just creating superb, natural food but of giving our clients something that was a real experience. This vision is still true today. The Benugo brand stretches from our own award-winning high street stores to our daytime cafés and restaurants and event catering within some of the world's best-loved public spaces and visitor attractions.

We pride ourselves on using the finest, ethically-sourced local ingredients to create our dishes. Our menus are uncomplicated, letting the quality of the food shine through, reflecting the nature of your event. We update our menus regularly to ensure we are always using the very best seasonal produce. We will work in close partnership with you to realise the vision for your event, no matter the size.

SUSTAINABILITY SNAPSHOT

Food and drink

-  Our coffee is 100% Rainforest Alliance Certified. We have chosen this certification as, in addition to trading fairly with local farmers, it also takes the planet into consideration.
-  At all of our sites we offer plant-based milk alternatives free of charge to encourage more frequent use.
-  In addition to working with UK Red Tractor our milk options are entirely UK sourced and a third is accredited organic.

-  96% of our fresh eggs are UK RSPCA Assured free-range. Every Benugo manufactured products, from our cakes to our sandwich fillings are made with UK free-range eggs.

-  We put a focus on UK sourced foods that align with seasonal availability, such as British potatoes which are available all year round, compared to strawberries which we use in their season.

-  We work with Life Water. Through their charity, Drop4Drop, to date we have funded 79 clean water projects, providing 52,127 people with clean water.

Other

-  We have consistently been working to remove packaging from back of house areas with reusable crates now being used. This has led to 17 tonnes of cardboard annually being eliminated from our supply chain.
-  Our cooking oil is collected by Olleco and turned into biodiesel.
-  We weigh and record our food waste and have a target in 2026 to reduce it by 20% from 2019.

Thank you for your enquiry and we hope that our menus excite you.

We are very happy to discuss your requirements and to talk through any bespoke options that you may be interested in.
