

TOTTENHAM HOTSPUR CONFERENCE & EVENTS

Menu pack 2024/25

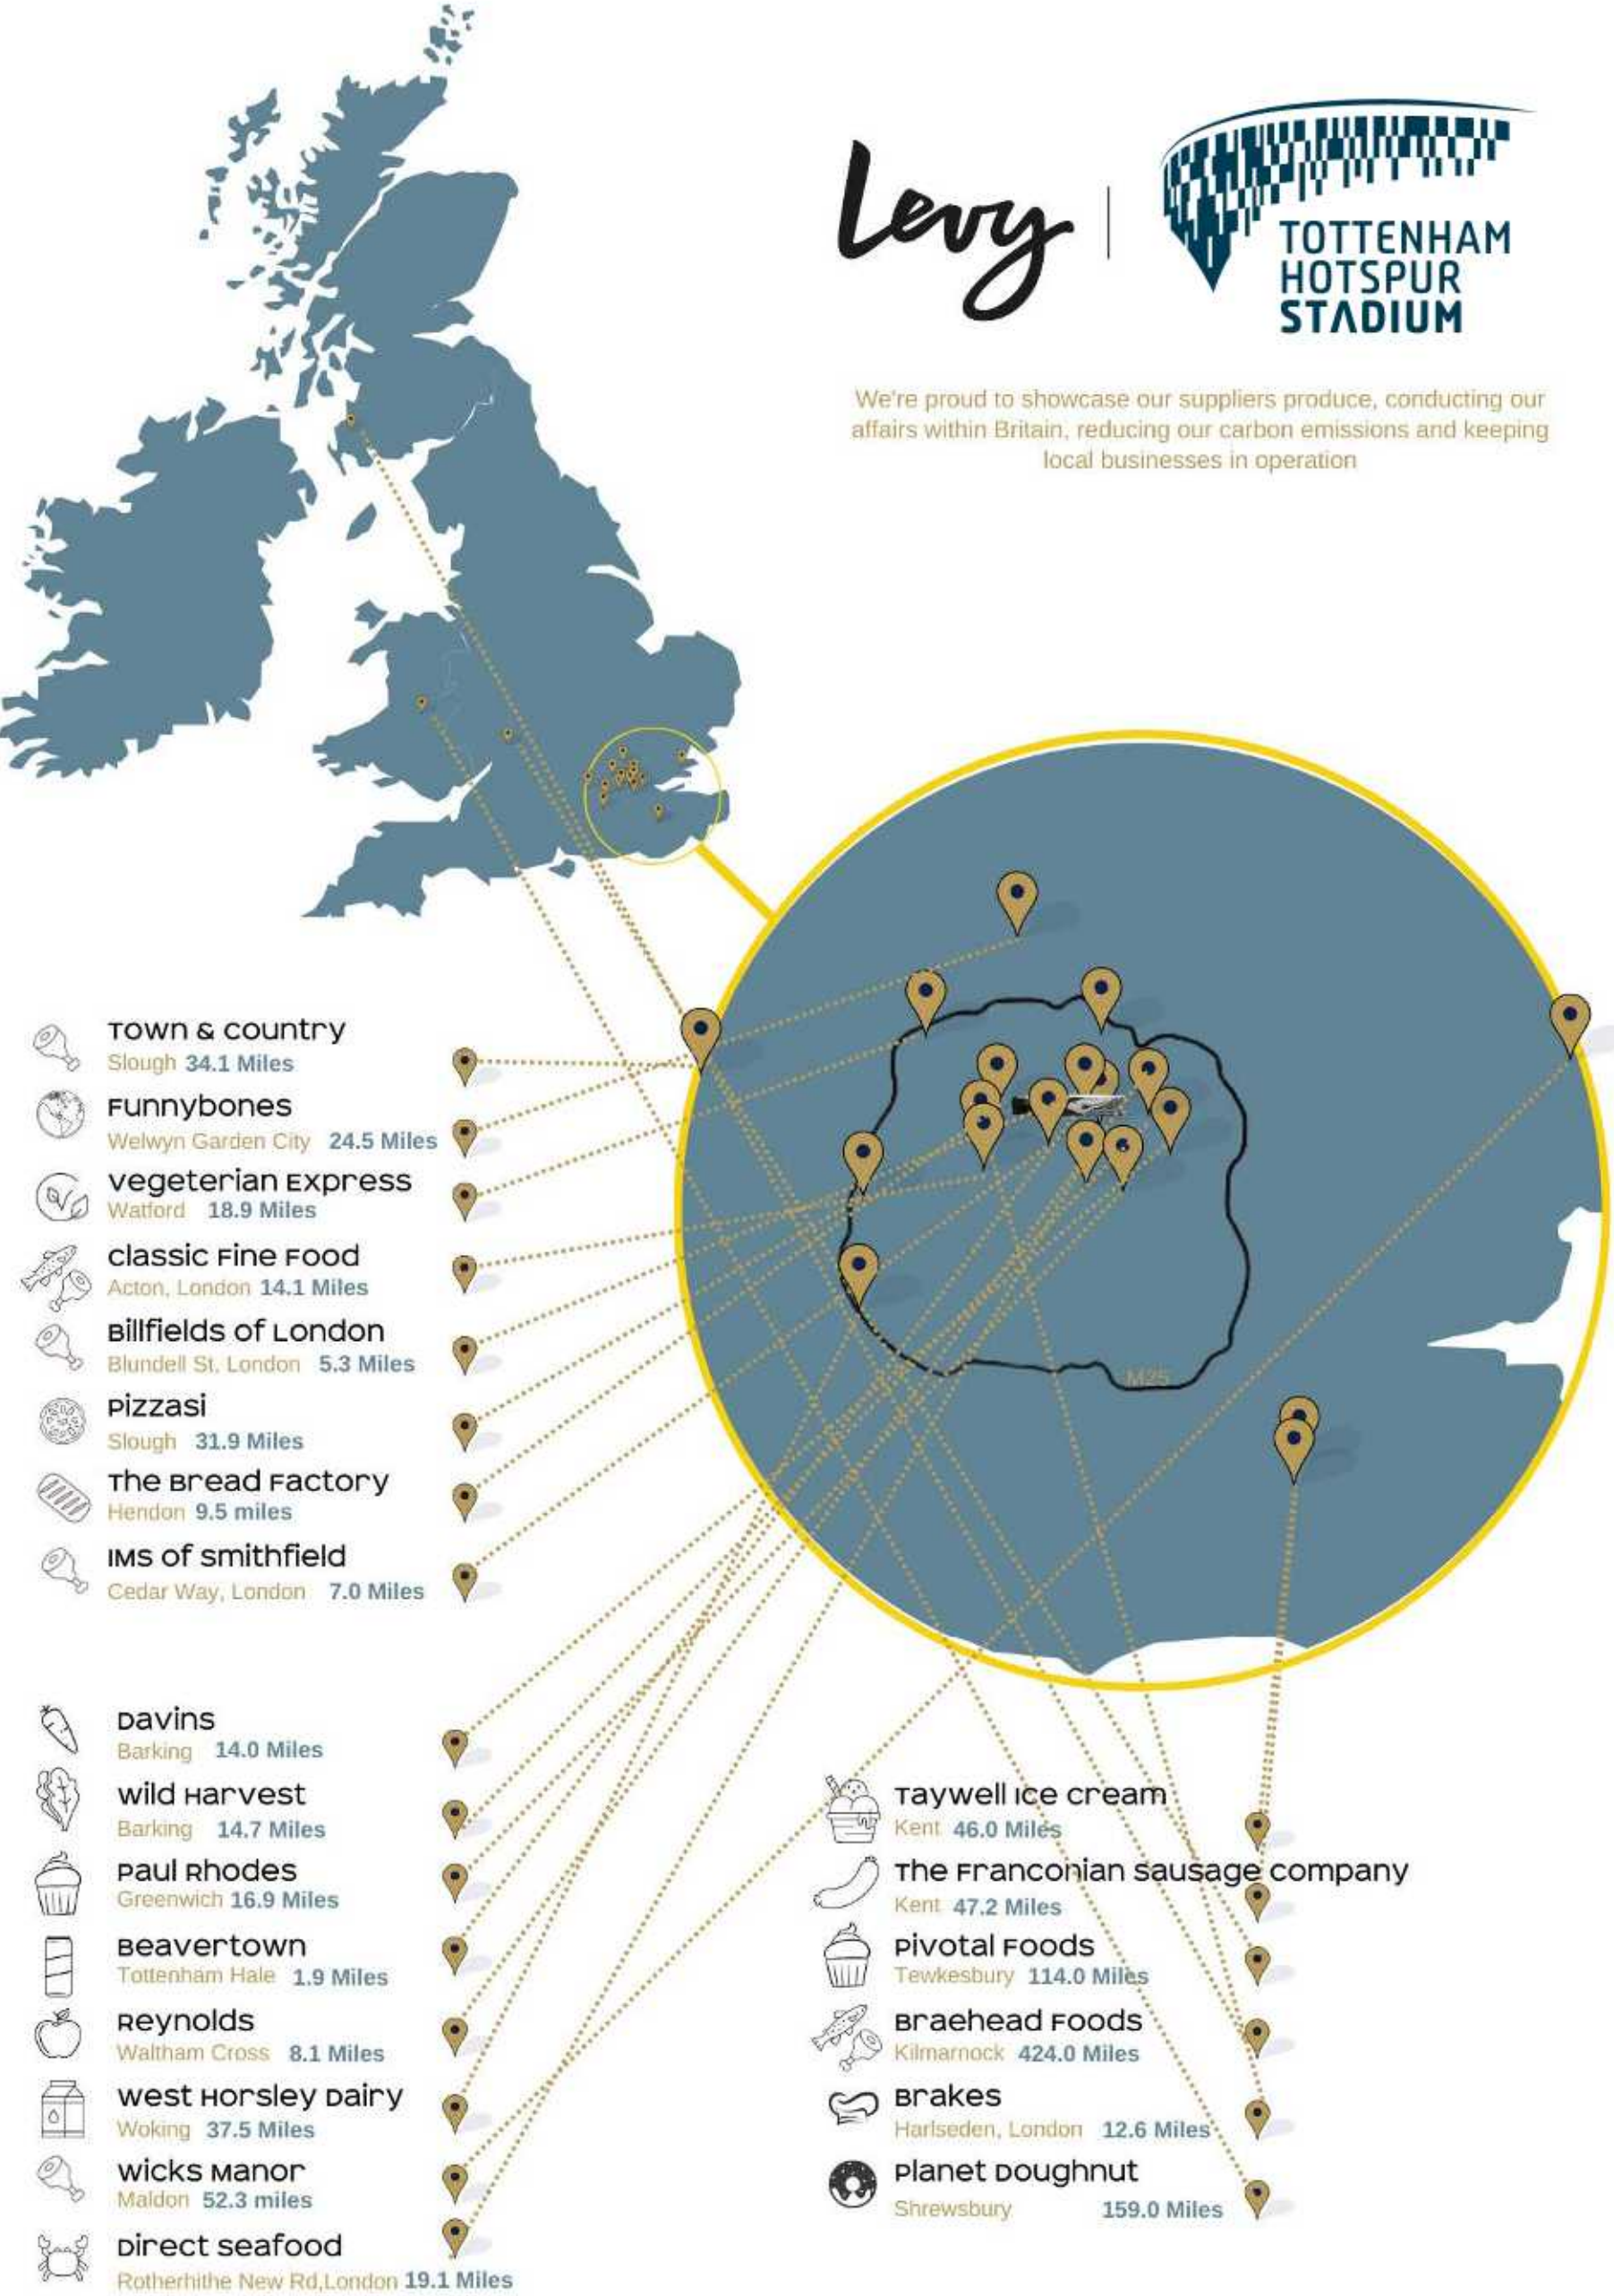

Food shouldn't just be delicious but, whenever possible, sustainable too. Working closely with our catering partner, Levy UK+I, we're committed to using local businesses as not only does it support them, but the fresh produce results in better food quality too.

A Club renowned for its firsts, we're the first in the industry to publish a Net Zero plan, which will help us to fulfil our ambition of creating a sustainable food system. We hope to reach net zero emissions by 2030, so we can support people in living healthier, happier and more productive lives – without compromising on standards. Examples of how we're working towards this goal is by minimising dairy across menus, introducing a greater variety of carbon-friendly beverages, and reducing food waste.

Dedicated to catering to all dietary requirements and tastebuds, over 50% of menus are vegetarian, plant-forward or vegan. Moreover, we incorporate at least 80% of British seasonal fruit and vegetables into dishes to combine nutritional needs with exceptional flavour, while using free-range eggs only and MCS graded 1-3 fish. Thinking beyond the plate, we continue to source more environmentally sustainable alternatives to single-use plastic as we aim to phase it out across operations.

 At Tottenham Hotspur Stadium, you can enjoy every bite knowing that your food doesn't just taste good but is good in every way.

Images Not To scale.

Foodsteps

Levy UK+I and Foodsteps are working together to create carbon labelling on our menus. Foodsteps calculates the GHG emissions of food products across the complete life-cycle, from farm, packaging, transport to food waste.

This allows our chefs to make climate-friendly changes when designing menus, and also encourages our guests to choose meals with a lower climate impact.

Foodsteps rank food from items from “Very Low” to “Very High” according to their carbon intensity, on a ranking of A-E.

We will be using the carbon labelling (right) on our menus.
